

CT-CS60

The TRUSST® Crank Tower 6.0 is a crank up tower stand with a maximum height of 6 meters (19.7 ft). It is capable of lifting and supporting up to 250 kg (550 lbs) safely. Constructed almost entirely of metal, there are no plastic parts to break or strip. The Crank Tower 6.0 comes complete with a T-bar adaptor. The T-bar adaptor is adjustable to fit multiple sizes of truss. The rubber coated feet and polyurethane wheels help protect flooring surfaces from scratches. The built in safety locks and integrated winch brake prevent the the load from coming down uncontrollably.

FEATURES

- Heavy-duty crank tower geared towards production companies and the mobile entertainer
